

Your trusted partner for custom solutions in
agricultural implements and machinery since 1968

Manufacturing

The original factory of BPI Manufacturing was founded in 1968 at Bothaville in the Northern Free State to produce commercial and custom-made agricultural equipment.

A comprehensive range of support services ensures owners and operators benefit from the best possible advice and guidance before buying as well as the best possible back-up service.

More than 50 years of history and heritage confirm its leading role in the agricultural equipment industry and a market leader in Africa through its vast experience, distributing through a network of over 500 cross-continent dealers. Through the initiative, vision and experience of management and the engineering department of BPI Manufacturing, the Agritec range of products is kept alive and constantly improved.

A Highly skilled workforce produces a wide range of tested and proven quality products to suit the demands and harsh conditions of Africa. Examples of such implements are ploughs, offset discs, tandem discs, tine implements, dam scoops, trailers, harvesters, threshing machines and more. At BPI Manufacturing, implements are designed, developed and built, as well as ground engaging spare parts. BPI Manufacturing is completely self-sufficient and not dependent on external suppliers to maintain its development and production.

A well-established Dealer network of Co-operatives and Private Enterprises is currently in place covering South Africa and all neighboring states, all SADC countries and beyond. From 2010 BPI Manufacturing commenced exporting to the African Continent. BPI Manufacturing, your trusted partner for custom solutions in agricultural implements and machinery since 1968.
